## ***LIST AND PRICES OF DECLARED STANDARDS***

## ***Introduction***

Standards are document that provide guidelines or characteristics for product or process and they play an important role in trade and commerce within all countries of the world.

The Seychelles Bureau of Standards is mandated under the SBS Act 2014 to develop national standards and to promote their use with the aim to strengthen the economy of the country and the quality of life of its people.

Seychelles Standards are prepared by technical committees having participation from private and public organizations, industries, businesses and the public in general so as to guarantee a wide measure of consultation and support in the standard work. The committee structure seeks to bring together all those with substantial interest in particular projects and takes account of all significant view points making use of foreign and international standards as reference materials.

Seychelles Standards developed by SBS covers areas in the field of food, pesticides, detergents, construction, management, paint, electrical, plastic and environment.

Copyright exists for all Seychelles Standards publications.

No part may be reproduced in any form without the prior permission in writing to SBS. This does not preclude the free use in the course of implementing the standards of details such as symbols and size, type or grade designations.
